Description : Description du produit Classic science fiction adventure novel. According to Wikipedia: "Jules Gabriel Verne (February 8, 1828"March 24, 1905) was a French author who pioneered the science-fiction genre. He is best known for novels such as Journey to the Center of the Earth (1864), Twenty Thousand Leagues under the Sea (1870), and Around the World in Eighty Days (1873). Verne wrote about space, air, and underwater travel before air travel and practical submarines were invented, and before practical means of space travel had been devised. He is the third most translated author in the world, according to Index Translationum. Some of his books have been made into films. Verne, along with H. G. Wells, is often popularly referred to as the "Father of Science Fiction"

Prsentation de l'diteur HardPress Classic Books Series Prsentation de l'diteur HardPress Classic Books Series Biographie de l'auteur Jules Gabriel Verne (8 February 1828 24 March 1905) was a French novelist,

poet, and playwright best known for his adventure novels and his profound influence on the literary genre of science fiction. Verne was born to bourgeois parents in the seaport of Nantes, where he was trained to follow in his father's footsteps as a lawyer, but quit the profession early in life to write for magazines and the stage. His collaboration with the publisher Pierre-Jules Hetzel led to the creation of the *Voyages extraordinaires*, a widely popular series of scrupulously researched adventure novels including *Journey to the Center of the Earth*, *Twenty Thousand Leagues Under the Sea* (1870), and *Around the World in Eighty Days* (1873). Verne is generally considered a major literary author in France and most of Europe, where he has had a wide influence on the literary avant-garde and on surrealism. His reputation is markedly different in Anglophone regions, where he has often been labeled a writer of genre fiction or children's books, largely because of the highly abridged and altered translations in which his novels are often reprinted. Verne has been the second most-translated author in the world since 1979, ranking between Agatha Christie and William Shakespeare. He has sometimes been called the "Father of Science Fiction", a title that has also been given to H. G. Wells and Hugo Gernsback. Family: In May 1856, Verne traveled to Amiens to be the best man at the wedding of a Nantes friend, Auguste Lelarge, to an Amiens woman named Aime du Fraysse de Viane. Verne, invited to stay with the bride's family, took to them warmly, befriending the entire household and finding himself increasingly attracted to the bride's sister, Honorine de Viane Morel, a widow aged 26 with two young children. Hoping to find a secure source of income, as well as a chance to court Morel in earnest, he jumped at her brother's offer to go into business with a brokerage. Verne's father was initially dubious but gave in to his son's requests for approval in November 1856. With his financial situation finally looking promising, Verne won the favor of Morel and her family, and the couple was married on 10 January 1857.
